

What's in your Drink?

First Taste: It had a really disgusting bitter-sweet taste that had your mouth extremely confused on what it just drank. It's not bad, but it is far from good.

After Taste: Better than the first taste, but at the same time, still horribly gross. Besides 5hr energy, this is the worst energy drink we tasted.

Description of drink: It had a very weird blue color to it, and that was probably one of the best things about it. It was also really hard to determine the actual flavor, the blue color suggested berry, but it was still impossible to know. Full Throttle was not pleasing to the mouth at all.
