

What's in your Drink?

First Taste: Like a diluted Venom or Monster, minus a lot of the taste too. It's really smooth though, making it easier to drink than many of the others and is actually kind of sweet.

After Taste: Red Bull has a very dull after taste, suggesting that most of the flavor present disappeared after the first taste. It still had some of its sweet properties, but not a lot.

Description of drink: For the gist of it, mainly just carbonated water and flavoring. Showed sort of a light yellow color, which most of these drinks do, and wasn't present with a lot of flavor which brought it down a lot on the awesome scale.
