

What's in your Drink?

First Taste: Really bubbly, and tastes really fruity right off the bat. It's a little tangy and sour but not really that bad.

After Taste: Resembles Juicy Fruit. The after taste is almost better than the first taste, it's not very tangy which just gives a slight pinch to the mouth and it's actually really good.

Description of drink: It's a light yellow, and has a very fruity and stingy, kind of tangy, long term taste to it. It's really fizzy, and gives your stomach a nice bubbly feeling, which sounds bad but it's actually not, so don't freak out. It's actually close to Juicy Fruit Gum.
